utah

While the Jaffa Group’s guiding principle is to maintain a strong commitment to design excellence, the firm also has a more practical tenet: Make the home-building experience an enjoyable one for everyone involved. With over 68 years of combined experience in the industry, father-son duo, Richard and Scott Jaffa, founded the firm in 1994 to pursue their shared architectural ideal of building homes with integrity, vision and distinction. What resulted was a thriving, homegrown enterprise that remains devoted to top-quality, superior service, while remaining sensitive to the needs of clients and their respective ideas, budgets and schedules. Whether it’s a custom home, townhouse or a remodeling project, from conception to completion, the Jaffa Group strives to remain true to its mantras. While remaining uncompromising to its aesthetic morals, the firm designs each residence in accordance with the beauty of its natural landscape, ensuring unsurpassed customer satisfaction.
